

O-Ring Detection/ Steel Stripper Jaws

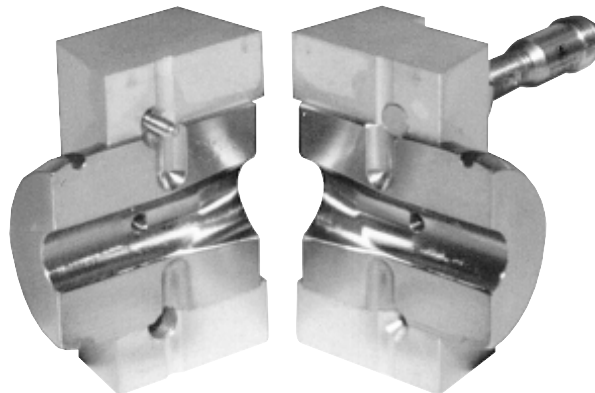

A sensor mounted in the head assembly checks for the presence of an O-Ring on the mandrel with every cycle of the machine.

If an O-Ring is not detected, a warning light turns on and the machine will shut down.

Steel Stripper Jaws, another available option on the ASP series of machines, provide extended life over our standard Delrin jaws.

ASP-1 shown with O-Ring Detection and Steel Stripper Jaws.

Steel Stripper Jaws with O-Ring Detection.
